

SAIKRISHNA GANGINENI

(972) 765-3419 | emailuvsk@gmail.com | [linkedin.com/in/saikrishna-gangineni](https://www.linkedin.com/in/saikrishna-gangineni)

PROFESSIONAL SUMMARY

MS graduate and AWS Certified Solutions Architect with hands-on experience building cloud and AI/ML solutions on AWS. Passionate about helping customers solve real-world challenges — skilled at translating technical architectures for both executive and developer audiences, and turning customer feedback into actionable solutions

AWS CERTIFICATIONS

AWS Certified Solutions Architect – Associate | **AWS Certified Cloud Practitioner**

TECHNICAL SKILLS

Cloud & Infra:	AWS (S3, Lambda, Glue, Redshift, Athena, IAM, CloudFormation, QuickSight, Bedrock), Azure Synapse
AI / ML:	RAG Pipelines, LLM Integration, Prompt Engineering, Agentic Orchestration, Scikit-learn, TensorFlow
Languages:	Python (Pandas, NumPy, Scikit-learn, SciPy), SQL, PySpark, JavaScript, Shell Scriptin
DevOps / Tools:	Git, GitHub, JIRA, Agile/Scrum, Databricks, Kafka, Hadoop
Data & Analytics:	Power BI, Tableau, Looker, Snowflake, dbt, ETL (AWS Glue, Informatica, SSIS, ADF)
Databases:	Snowflake, MySQL, SQL Server, Oracle, Teradata, Redshift

AI / CLOUD PROJECT

Enterprise RAG & LLM Intelligence Platform | Personal Project

Aug 2023-Dec 2023

Designed and built an end-to-end RAG pipeline to ground LLM responses in private enterprise data, using Python, vector embeddings, and a retrieval layer to enable secure, context-aware AI querying

- Implemented advanced prompt engineering and agentic orchestration patterns to automate multi-step reasoning workflows, reducing manual query resolution time and improving answer accuracy
- Deployed the solution on AWS (Lambda, S3, API Gateway) using serverless architecture, enabling scalable access for non-technical business users through a REST API interface
- Applied AWS security best practices — IAM roles, S3 bucket policies, and encrypted data-at-rest — ensuring private data remained protected throughout the LLM inference pipeline

PROFESSIONAL EXPERIENCE

Software Engineer | Nenice (Client: Banking client), Durham, NC

Feb 2025 – Present

- Architected and delivered card portfolio analytics solution on AWS (S3, Glue, Redshift) processing 100k+ accounts a pattern directly analogous to designing scalable cloud data solutions for enterprise customers
- Built and deployed a transaction fraud detection ML model (Logistic Regression, 88% precision) on cloud infrastructure, translating business risk requirements into a deployed AI solution
- Designed self-service analytics frameworks using AWS Quick Sight and Tableau, enabling non-technical stakeholders to independently access insights — reducing ad hoc requests by 45%
- Collaborated with banking client stakeholders to gather requirements and translate business risk needs into a deployed ML solution
- Implemented SOX/AML compliance controls using Snowflake row-level security and AWS IAM, maintaining 100% audit readiness across two regulatory cycles

Software Engineer Intern | Holiday Channel, Colorado Springs, CO

Jan 2024 – Dec 2024

- Partnered with product and leadership teams to define KPI requirements and deliver self-service analytics tools
- Designed end-to-end ETL pipelines on AWS (Python, SQL) ingesting user behavioral data from 3+ sources, reducing data refresh latency by 55% simulating scalable data architecture for a product used by 50K+ active users
- Built Power BI and Looker dashboards tracking real-time KPIs for product and leadership teams, translating complex data into actionable business intelligence

Software Engineer | VBRS (Client: Kakatiya Energy Systems), Hyderabad, India

Aug 2021 – Jun 2022

- Engineered an IoT sensor data pipeline in Python processing time-series data from 10,000+ smart streetlights, demonstrating large-scale data architecture design across distributed devices
- Built anomaly detection model (Isolation Forest, 87% accuracy) to proactively flag hardware failures, reducing field maintenance costs by 30% an early example of applying ML to operational problems
- Quantified 55 million units of annual energy savings through Python statistical modeling, translating complex analysis into executive-level sustainability reporting

EDUCATION

Master of Science, Information Technology & Management University of Texas at Dallas	Aug 2024
Bachelor of Science, Computer Science K.L. University, India	May 2021
